NIHI® Rote & Hospitality Academy Drone Policy

We appreciate that some of our guests would like to use drones in order to capture special images, memories, and/or footage of their time at NIHI® Rote & Hospitality Academy but we also need to guarantee that all of our guests are afforded the highest levels of safety and privacy during their stay with us.

We do permit our guests to bring a personal drone to the island for photography or videography purposes but please note that it *must be declared* to the NIHI® Rote & Hospitality Academy team on arrival, who will then advise on safety and security, including details around approved fly zones and flying times.

Use of drones at NIHI® Rote & Hospitality Academy is therefore subject to pre-approval and based on (but not limited to) the following rules and regulations:

- Guests may not make use of any drones unless they have been registered with the front desk team first.
- Guests may fly their own drones while surfing but this will be limited to **no more than 2 drones** at a time and must be carried out with the utmost respect to the privacy of fellow guests. No guest may film another guest's experience.
- Guests may fly their own drones to document other water-based activities but only once the drone has been registered and flight plans pre-approved. Again, no other guests may be filmed.
- Drones are only allowed by the beach. – This is fine – remember the beach is a PUBLIC BEACH.
- Drones are not permitted to fly over any villas, Savu restaurant, Nammo Beach Club, Wellness Spa, Equine area or any shared public spaces on the property.
- Drones are permitted during visits to Telaga Nirwana Lagoon and NIHI® Rote & Hospitality Academy sessions.
- Any special requests for shooting restricted areas need to be approved by our General Manager.
- NIHI® Rote & Hospitality Academy will not be held responsible for any damage to drones due to accident or flight error. In the event of an accident resulting in damage to/of resort property, the registered guest will bare the expense to repair/replace damages.

Thank you for your cooperation and understanding!
