Nihi Sumba Survey expedition for mantas

After boarding in Labuan Bajo, guests will be introduced to the friendly crew and shown to their cabins, before Rascal sets sail towards Sumba.

Upon reaching the north coast of Sumba, the Conservation International experts will begin conducting their research, in association with Manta Trust, who are on a mission to raise awareness and provide education on manta ray conservation. Guests will experience the scientists tagging mantas, and will have the opportunity to take part in fascinating exploratory dives alongside the experts, allowing them to get up, close, and personal with manta rays, learning more about the incredible creatures along the way.

Following the exploration along Sumba's northern coastline, guests will disembark at Waikelo before being transported to the south of the island, where Nihi Sumba is situated; perched atop one of Indonesia's most un-explored islands, Nihi Sumba is a spectacular resort where guests can relax following their time on Rascal. Parallel to Rascal's core values, Nihi Sumba prioritises luxury with a conscience, and is committed to supporting the vitality of its locale.

With a private beach, water sports facilities, spa, equestrian centre, beach cinema, ping-pong table, pool tables...and much more, guests will be able to relax in remote paradise, continuing their luxury trip from sea to land.
